## Practical 2

Creating account, repository on Github and Cloning repository in Github

Step 1: to create an account on github go to <https://github.com> click on Sign Up

Step 2: you will be directed to a page like this

Join GitHub

# Create your account

Username \*

Email address \*

Password \*

Make sure it's **at least 15 characters** OR **at least 8 characters including a number and a lowercase letter**. [Learn more](#).

Email preferences

☒ Send me occasional product updates, announcements, and offers.

Verify your account

Create account

Fill in your details as per the requirement. Like this:

Join GitHub

# Create your account

Username \*

Email preferences

☒ Send me occasional product updates, announcements, and offers.

Verify your account

Create account

By creating an account, you agree to the [Terms of Service](#). For more information about GitHub's privacy practices, see the [GitHub Privacy Statement](#). We'll occasionally send you account-related emails.

Step 3 : After clicking on create account you will be directed to this page:

## Please verify your email address

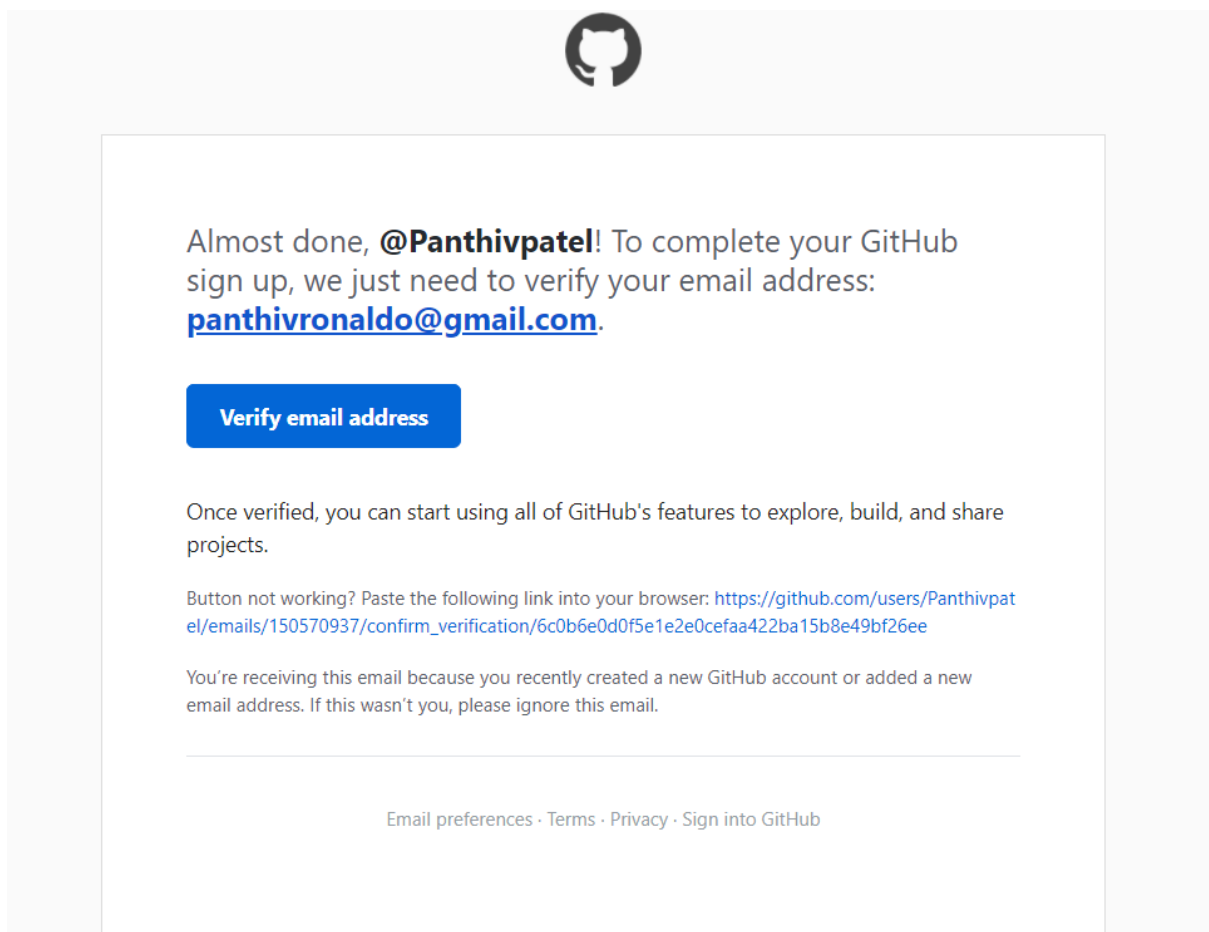

Before you can contribute on GitHub, we need you to verify your email address.

An email containing verification instructions was sent to [surabhisalunke05@gmail.com](mailto:surabhisalunke05@gmail.com).

[Resend verification email](#)[Change your email settings](#)

Step 4: Check your email for a verification mail from GitHub

The email will look something like this:

Step 5: Click on verify email address it will take you to this page:

### What do you want to do first?

Every developer needs to configure their environment, so let's get your GitHub experience optimized for you.

**Start a new project**  
Start a new repository or bring over an existing repository to keep contributing to it.

Create a repository

**Collaborate with your team**  
Improve the way your team works together and get access to more features with an organization.

Create an organization

**Learn how to use GitHub**  
Get started with an "Introduction to GitHub" course in our Learning Lab.

Start Learning

[Skip this for now >](#)

## Step 6: to create a repository

Pull requests Issues Marketplace Explore

Your email was verified.

- New repository
- Import repository
- New gist
- New organization
- New project

## Step 7: fill in the information shown according:

## Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

---

Owner \*      Repository name \*

 Panthivpatel ▾ / panthiv 

Great repository names are short and memorable. Need inspiration? How about [musical-funicular?](#)

Description (optional)

---

- 
- ☐  **Public**  
Anyone on the internet can see this repository. You choose who can commit.
- ☒  **Private**  
You choose who can see and commit to this repository.

---

### Initialize this repository with:

Skip this step if you're importing an existing repository.

☒ **Add a README file**  
This is where you can write a long description for your project. [Learn more.](#)

☐ **Add .gitignore**  
Choose which files not to track from a list of templates. [Learn more.](#)

☐ **Choose a license**  
A license tells others what they can and can't do with your code. [Learn more.](#)

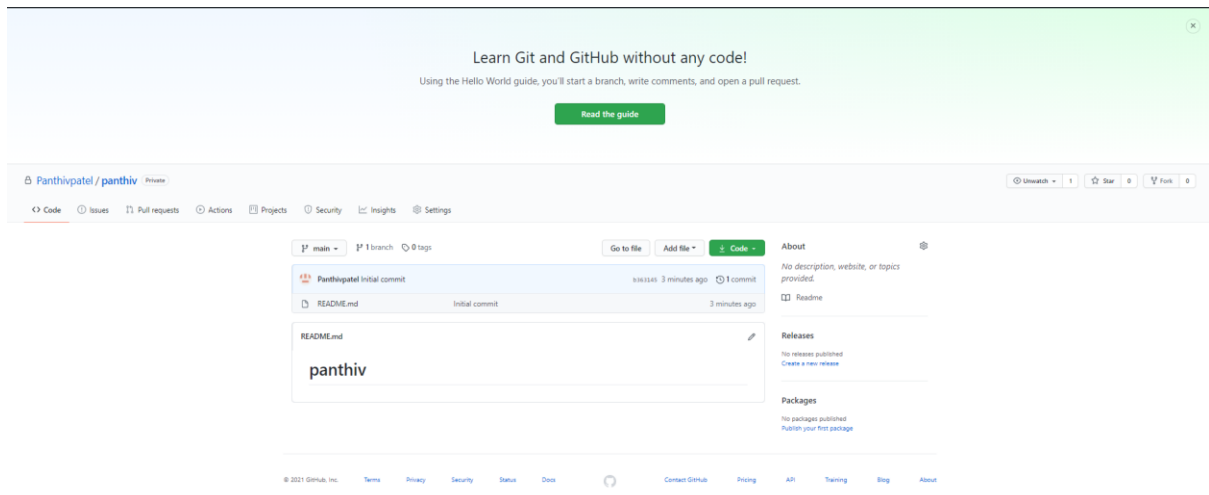

This will set  **main** as the default branch. Change the default name in your [settings](#).

---

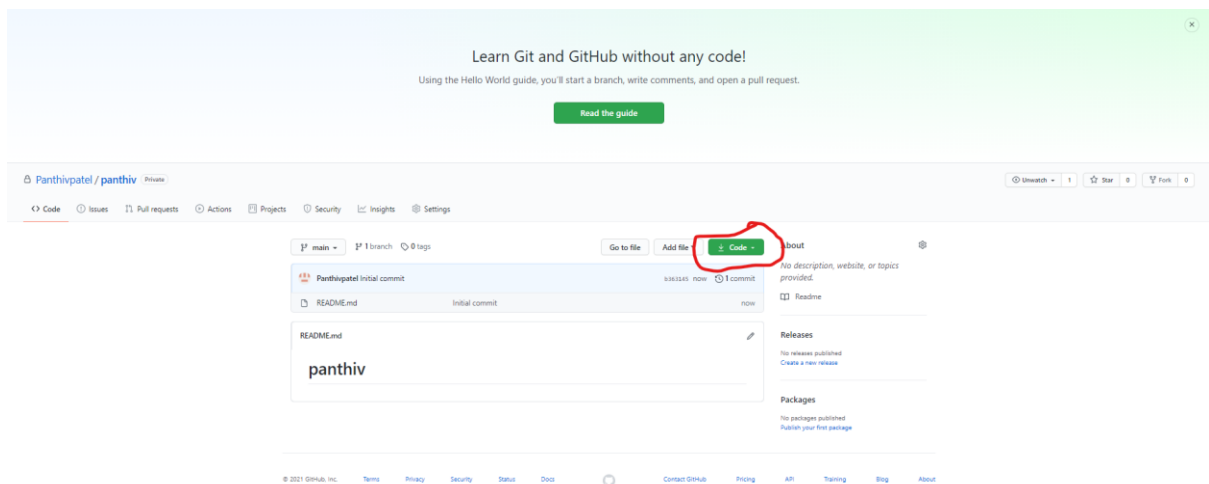

[Create repository](#)

---

Step 8: you will see your repository on your account

Step 9: to clone the repository click on the green color code button:

Step 10: copy the url by clicking on the small clipboard icon:
